

Observations

Scenarios

1. Sign up with a valid Google email address using the Google authentication button on the register page and confirm the email address
2. Log in using the 'Tester' details and check the 'Remember me?' checkbox
3. Add a product to the basket from the products' page with the quantity of 20, and ensure the quantity is changed by inputting it to the text input
4. Make an order with 2 products in the basket and include a valid discount code
5. Filter for products in the products' page using the stock and city filters
6. Increase the quantity of a product on the 'My Basket' page by 4

Scenario table for observation

Scenario	Number of clicks it should be done in	Estimated Time	Actual Clicks	Actual Time	Comments
1	4	20 seconds			
2	5	40 seconds			
3	3	20 seconds			
4	12	50 seconds			
5	3 to 5	15 seconds			
6	7	25 seconds			

Observations

Denas

Scenario	Number of clicks it should be done in	Estimated Time	Actual Clicks	Actual Time	Comments
1	4	20 seconds	6	13 seconds	None
2	5	40 seconds	4	13 seconds	Did not click checkbox
3	3	20 seconds	25	20 seconds	Used increment buttons which meant text input is not obvious enough to be interacted with.
4	12	50 seconds	19	42 seconds	Included the login time & clicks, Tester had to go back to homepage to open basket since the

					products' page does not work.
5	3 to 5	15 seconds	4	7 seconds	Only enable one city.
6	7	25 seconds	6	11 seconds	Confused where the 'My Basket' page is located.

Raiyan

Scenario	Number of clicks it should be done in	Estimated Time	Actual Clicks	Actual Time	Comments
1	4	20 seconds	6	14 seconds	None
2	5	40 seconds	4	13 seconds	Clicked checkbox
3	3	20 seconds	25	23 seconds	Used increment buttons which meant text input is not obvious enough to be interacted with.
4	12	50 seconds	19	45 seconds	Tester had to go back to homepage to open basket since the products' page does not work again.
5	3 to 5	15 seconds	4	8 seconds	Enabled two cities.
6	7	25 seconds	6	10 seconds	Confused where the 'My Basket' page is located.
